PESAN

POLISH PRODUCER OF DISINFECTION MATS

Crossing, universal, vehicle disinfection mats.

Veterinary, zootechnical mats.

Mats in the prevention of hoof diseases.

CROSSING DISINFECTION MATS

Disinfection mats are basic equipment of sanitary and disinfections rooms. They are indispensable elements of veterinary surgeries, farms, livestock facilities cosmetic companies, pharmaceutical companies, mushroom halls, food processing plants as well as diagnostic laboratories, warehouses, stocks. They are to be put at the border crossings and quarantine points. Mandatory while purchasing animals at the fairs or exhibitions. They are used in objects where high hygienic standards are required. Properly selected disinfection mat should have at least the door by which it is about to be put and length preventing passing by or skip it. Vehicle mat should be a little wider than vehicle and its length at least few cm longer than the circuit of the largest vehicle passing through it.

CONSTRUCTION OF DISINFECTION MATS

TOP: PVC net in black, red, blue or other color, as ordered. It can be with logo or slogan. Net spreads disinfectant and leaves the dirt outside. It is resistant to abrasion and high pressure. The evaporation of the disinfectant is properly dosed.
FILLING: Thick polyurethane foam. The absorbent input keeps the liquid inside the mat and shapes it.
BOTTOM: Tarpaulin depends on the type of the mat: plain or anti-slip. It does not allow the liquid to go outside the disinfection mat. Strong and durable. Resistant to weather conditions. In blue color for anti-slip mats and green, grey or others for economic ones.
INSERT WITH DATA: Standard Pesan insert with a producer of the mat. It can be changed on distributor's data, like logo, barcode etc.
ACCESS TO THE FILLING: It depends on the type of the mat: zip or velcro.

VEHICLE DISINFECTION MATS

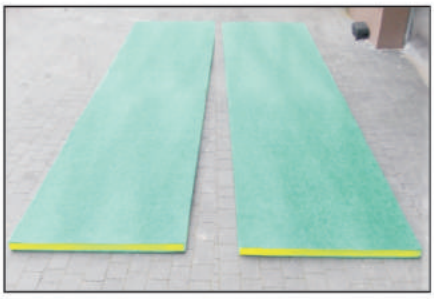

Vehicle disinfection mats are mandatory equipment for farms, food processing plants or other entities producing food, medicines, cosmetics. Their use is obligatory. They are put in the gates and passages in order to disinfect wheels of vehicles as well as worker's and visitors' shoes.

VEHICLE DISINFECTION MATS TPT

These kind of mats are economic ones, intended for crossing of cars, lorries, tractors and other vehicles. Recommended wherever there is a need to secure the ground from leaking disinfectant. Tested with high traffic. Thickness around 5,5cm. Resistant to influence on disinfectants. Made of thick foam and two-sided adhesive foam with strong bonding of stiff polyester nonwoven fabric. Polyurethane foam allows to keep the disinfectant inside for a long time. Layer of polyester nonwoven fabric protects the mat from damage and gives the stiffness. Additionally, protects disinfectant from excessive evaporation.
Mats can be used outside also at temperatures below zero. Dimensions of TPT mats are 120x200cm. They can be combined in bigger disinfection units.

VETERINARY AND ZOOTECHNIC MATS

Mats for treatment and surgical tables. The top of the mat is plain which assures an easy cleaning and disinfection. Anti-slip bottom of the mat keeps it firm on a table. Mats are equipped with velcro belts, fastened under the table. Any size and thickness can be prepared. Mats are durable and aesthetic. There is also a possibility to prepare special mats for individual needs.

CONSTRUCTION OF VETERINARY AND ZOOTECHNIC MATS

TOP: Tarpaulin plain material, easy to maintain cleanliness. Resistant to washing agents and disinfectants used in veterinary. Easy to keep it hygienic . Available in different colors. Tear resistant.

FILLING: Thick polyurethane foam, thickness from 20mm to 100mm.

BOTTOM: Tarpaulin material – anti-slip assures mat's stability on slippery surfaces. Bottom equipped with belts and velcro, which additionally allows to keep it firm on the table in order to maintain animal and staff. Comfortable to clean, water resistant.

MATS FOR ANIMALS

These mats are recommended as a bed for small and large animals. They can be produced in any dimensions to adjust for different size and species of animals. Mats provide thermal insulation and comfort for animals. They are recommended especially for animals in recovery and after surgeries. Easy to clean and disinfect surfaces of the mats.
